RETAIL *therapy?*

HornerXpress Worldwide is helping businesses grow all over the world and that sometimes means opening or refreshing a retail store or showroom. We can supply all kinds of items to help your shop look its best:

- Banners & posters (standard & customized)
- Point of purchase displays
- Demonstration & display products
- Brochures & catalogues
- Store fixtures & shelving
- Water testing equipment
- Toys & novelties
- Retail friendly products & packaging

Here are a few easy tips to create a great retail space - contact us for more!

- Make sure you have the best and biggest signage possible - the goal is to attract attention and entice customers to visit and stay.
- Refresh and revive your store décor on a regular basis - you want it to be clean and bright with fresh looking merchandise and constantly changing displays. Paint is always an effective way to enhance your space.
- Get rid of the smell of chlorine!
- Think about what you like to experience when shopping and duplicate it - great customer service with a friendly smile is a must.
- Have some type of moving display - preferably with water. A simple fountain or waterfall works wonders.
- Offer water testing - your customers often need help with their water chemistry and testing properly will give you the information you need to make the correct diagnosis and supply the right products to solve their problem.
- Run special offers, hold customer appreciation days, create seasonal events and offer training seminars - plus rewards for referrals, coupons and loyalty programs.
- Add an online element to your business - many customers like to shop online so it's important to have a presence with a shopping cart for those who like to buy online.
